

# **Somersetshire Coal Canal Society**

## **Role Description – Restoration Lead**

The Society works with many external bodies that can help us achieve our objectives of restoring the northern branch of the canal to water while organising our own work parties at various locations along the canal route. Each work party is led by a Work Party Organiser.

The Restoration Lead should be a member of the committee and their duties include the following:

- To co-ordinate the work of the Work Party Organisers, reporting progress and issues to the committee of the Society.
- To provide guidance to the Work Party Organisers where required.
- To co-ordinate requests for funds for tools and equipment to work parties where funding is available.
- To lead the work of the committee in developing short and long term project plans and proposals for the restoration of the canal to water.
